EXECUTIVE SUMMARY

Orbit Digital proposes an enterprise procurement solution backed by experienced consultants and several customer references. Integration detail is limited.

PROPOSED TECHNICAL SOLUTION

Describes a configurable enterprise platform and general connectivity options. Specific interface designs, data migration methods, API specifications and scalability benchmarks are not supplied.

IMPLEMENTATION PLAN AND TEAM

11 weeks are estimated for discovery, configuration, integration, testing and deployment. Phase-level durations, staffing commitments, dependencies and contingency arrangements are not fully detailed.

COMMERCIAL PROPOSAL

Implementation: INR 25,00,000. Annual support: INR 3,50,000. Cloud hosting and third-party licenses are excluded. Change-request pricing is subject to commercial negotiation.

SECURITY AND COMPLIANCE

Mentions access controls, encrypted connections and standard enterprise security practices. Certification documents, audit procedures and detailed privacy controls are not attached.

SUPPORT AND EXPERIENCE

Provides a named account manager, business-hours support and quarterly reviews. Five relevant customer projects and references are listed. Response and resolution service levels require confirmation.

KEY RISKS AND OPEN ITEMS

Vague integration approach, incomplete delivery milestones, missing detailed compliance evidence and unconfirmed support service levels.
